

Langkah-langkah membuat akun Github :

1. Masuk ke dalam website <https://github.com/>
2. Klik “Sign up” di pojok kanan atas

3. Pilih dan klik “ Create a free account”

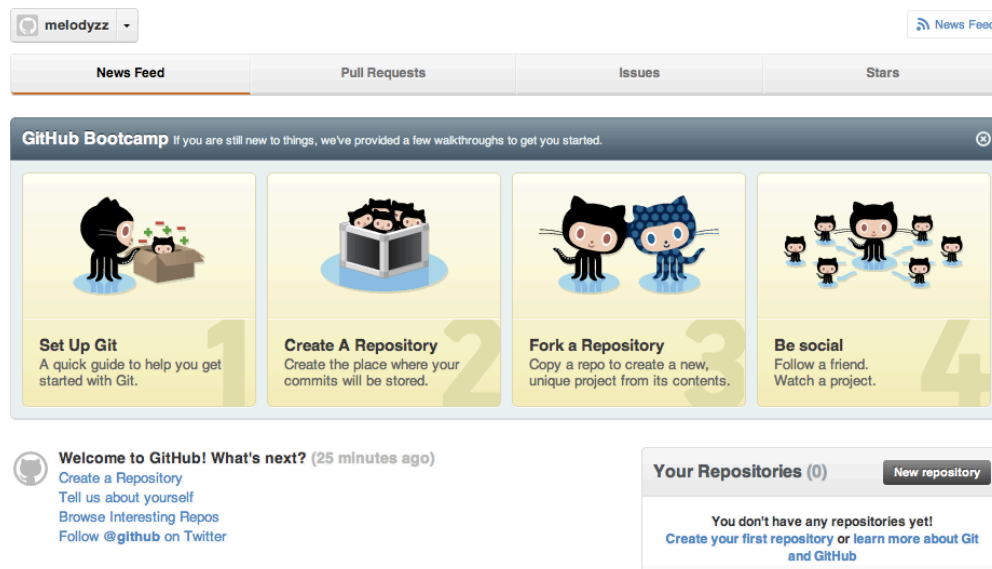

4. Isi Personal account dengan benar
5. Klik “Create an account”

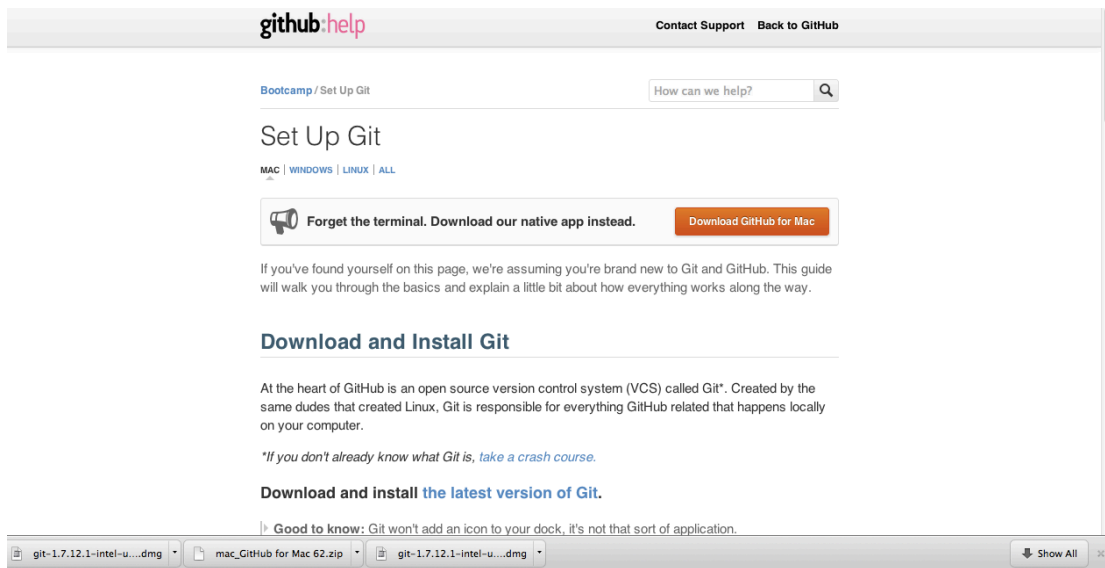

The screenshot shows the GitHub account creation interface. On the left, under the heading "Create your free personal account", there are four input fields: "Username", "Email Address", "Password", and "Confirm Password". Below the "Email Address" field, a small text says "We promise we won't share your email with anyone." Below the "Password" field, a small text says "Must contain one lowercase letter, one number, and be at least 7 characters long." Below the "Confirm Password" field, there is a yellow box with the text: "By clicking on 'Create an account' below, you are agreeing to the [Terms of Service](#) and the [Privacy Policy](#)." At the bottom right of this section is a green button labeled "Create an account". On the right side, there is a section with logos for "facebook", "twitter", "mozilla", and "37signals", followed by the text "You're joining the smartest companies in the world". Below this, there are three bullet points: "✓ Email support", "✓ Upgrade, downgrade or cancel at any time", and "✓ Secure, reliable, always-available repository hosting".

6. Jika belum mempunyai aplikasi github, disarankan mendownload github pada “Set up Git”

7. Kemudian buat repository pada “ Create a Repository”

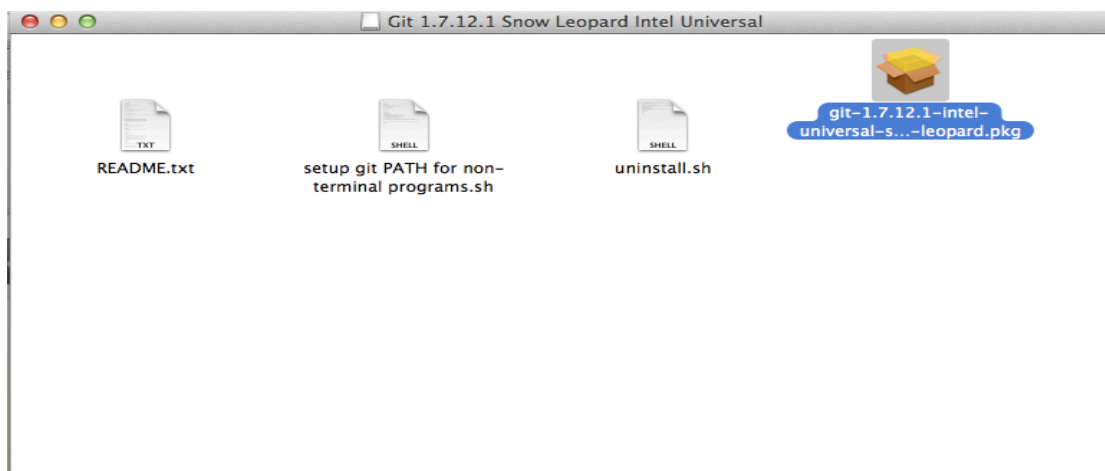

<https://github.com/melodyzz/>

Note : Disini saya melakukan instalasi untuk mac os X. Tetapi saya tetap tidak bisa melakukan instalasi Git pada Git yang diberikan. Oleh karena itu saya mencari tahu di google dan menemukan sedikit bantuan jawaban.

Jika anda menggunakan Mac os X , ada alternative lain untuk mendownload GIT :

1. downlad GIT package di <http://code.google.com/p/git-osx-installer/>
2. Data akan berbentuk .zip

3. Lakukan instalasi GIT

4. Setelah melakukan instalasi, maka GIT siap untuk digunakan
